

# mgmt: next generation config management

[github.com/purpleidea/mgmt](https://github.com/purpleidea/mgmt)

# Classical architectures

# Problems?

# SPOF

**What if server/orchestrator is unavailable? 🙄**

# Scale

 **I'll ssh all my clusters at the same time** 

# Real Time?

**Please wait the next run to see changes... ⌚**

# Demos

# Real Time Management

# Resources Export Between Nodes (etcd)

# Run Services (systemd)

**(very) young** 🧒

**current version is 0.0.11**

**Friendly** 👍

**open community/dev ([@purpleidea](#))**

**[#mgmtlove](#) github issues**

# Thanks 🙌

And have fun with **mgmt**
